

**4 times the flow and 4 times the capacity/volume*
AND ~ there's Simply no Separate Tap**

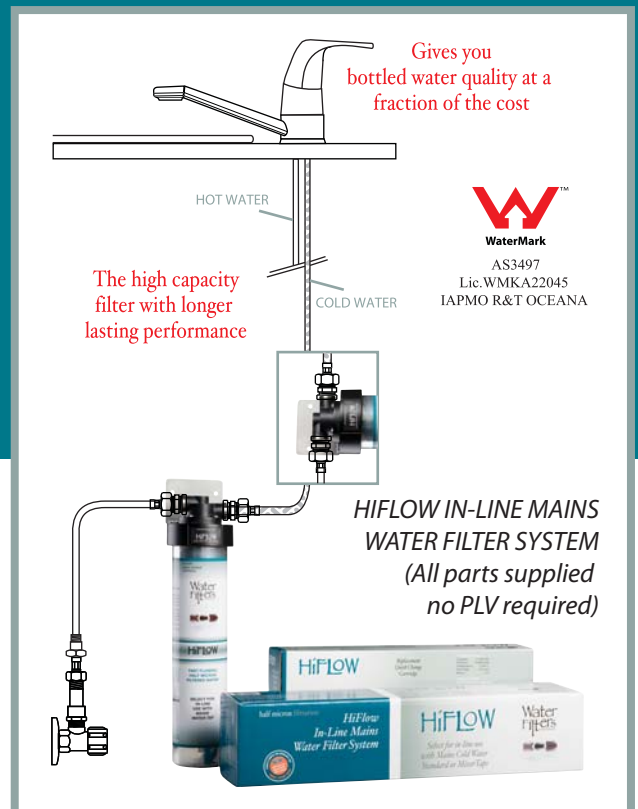

the **NEW** HiFlow In-Line Mains Water Filter System

The new HiFlow water filter from Water Filters Australia delivers 1/2 micron filtered water at 8.3LPM and provides 11,355 litres annually.

- It's the **NEW** System that easily mounts under the sink (*either horizontally or vertically*)
- HiFlow is plumbed inline to any mixer or standard cold water tap.
- **AND...**HiFlow removes Chlorine, Cysts, Lead and inhibits Limescale buildup.

* compared to other separate tap filter systems
